

# IP 10 Inclusive Carousel

## Moving

The Inclusive Carousel allows all children to experience the liberating experience of dynamic movement. This large piece provides a fantastic social space for all children, with ample room for 2 wheelchairs in addition to the 4 seats provided. Unique to this is the wheel in the middle which, for those with upper body mobility, can be used to self-propel encouraging independence and upper body strength and movement.

|                       |                                                                                |
