Inclusive Play

Inclusive Play designs, develops and manufactures innovative play products which offer choice and challenge, enabling children to play and learn together regardless of any impairment.

People with impairments are disabled by the fact that they are excluded from participation within the mainstream of society, as a result of physical, organisational and attitudinal barriers. Our products and play area designs are fully accessible and inclusive. We look at playground elements that might be preventing children and adults from accessing enjoyable play opportunities.

A fully inclusive playground promotes the social model of disability where barriers to play are designed out. It enables self esteem and builds confidence as well as encouraging independence. By letting social and physical barriers disappear in our playgrounds, we can provide equal play opportunities for all using the Six Senses of Inclusive Play. We develop our product, with an Inclusive focus.

Our design methodology PiPA (Plan Inclusive Play Areas) and fully inclusive product portfolio makes us unique in the play industry.

We are passionate about designing and promoting fully inclusive play spaces and are here to help you create yours.
PiPA (Plan Inclusive Play Areas)

PiPA helps you design Inclusive Playspaces. It evaluates existing play provisions, and is the go-to tool when designing new inclusive play areas.

Finding facilities the whole family can enjoy together can often be a real challenge. Our checklist and online PiPA Map, will help you create and find Inclusive Play areas.

Our comprehensive five point system helps inform new play space design, guiding you to select the right equipment for a wide range of different needs, you can be sure your design will be fully inclusive for all ages and abilities. PiPA can also be used to audit existing play spaces, identifying the gaps in provision or barriers to accessibility in the landscape.

Not only does PiPA review the play opportunities provided within a space. It assesses how you access the play area, the availability of information about the space and access to on-site local facilities and amenities. These key areas help illustrate the considerations families of children with disabilities must keep in mind before planning a trip to a play area. Awarded sites can achieve either Gold, Silver or Bronze status and are added to our online interactive map to help families find great community spaces that meet their needs.

PiPA was created in partnership with KIDS, the disabled children’s charity, and occupational therapists Constance Hurley and Amy Wagenfeld (Phd, OTR/L, SCEM, CAPS).

Full details of each site is listed to help families make informed choices.

Six Senses of Inclusive Play

Sensory Play engages all children and stimulates receptors for every child.

Sensory Play ensures the play experience involves the entire body even when a child cannot necessarily physically involve themselves in every activity. In your playground, you should consider how many senses are engaged from both a seated and a standing position. We recommend a minimum of three, though more is better!

The PiPA Checklist tool will ensure that your play space is accessible, provides appropriate levels of risk and challenge guaranteeing the correct sensory stimulation for all children, regardless of ability.

Our Six Senses Wheel explains the different sensory receptors and this key is used throughout our Inclusive Play catalogue to help you identify the appropriate play products for your play space. This is fundamental to our Inclusive Play design philosophy.

**Smell** - Contributes to enjoyment of life by enhancing social activities

**Sound** - Aids cognitive progression by developing the ability to process

**Sight** - Develops the visual sense, helping children arrive at appropriate

**Proprioception** - Awareness of self and joints

**Vestibular** - Contributes to balance and equilibrium

**Touch** - Helps differentiate pressure, texture and traction
The importance of dynamic movement for all children cannot be underestimated. However, it is particularly important for those children who cannot easily access traditional moving items. Experiencing movement and balance is great for engaging the vestibular sense and it vital for healthy brain development.

The Inclusive Play Wheelspin, is the original flush fitting roundabout and is without a doubt, the most inclusive piece of equipment on the market. The carefully thought out design with no barriers in the centre provides a large surface area allowing children to play in a group with ample room for two wheelchairs or buggies. It also provides standing room and includes seating with back support ensuring a parent or carer can sit with a child or for those who require additional postural support. The wheelspin offers the whole family a liberating experience of dynamic movement.

Our Wheelspin provides a fantastic, inclusive play experience, suitable for all, thanks to the following design features:

- Large surface area allows children to play in a group; it also provides ample room for up to two standard wheelchairs or one larger power-assisted chair
- No central barriers
- Flush ground level floor for ease of access
- Textured surface allows children with visual impairments to easily feel their way onto the equipment
- Seating with backrests for those children and adults who require postural support
- Seating provided allows plenty of room for parents, carers or friends to sit side by side and enjoy the fun together!
- Various colour options and customisable back rest option
The Wheelspin is the most dynamic and inclusive piece of equipment on the market. With its large surface area allowing children to play in groups with ample space for two regular wheelchairs or one larger power assisted chair. The carefully thought out design not only provides standing room it includes seating with back support ensuring plenty of room for a parent or carer to sit with their child or those who require additional postural support.

Wildlife Wheelspin

Silver Wheelspin

Playful Wheelspin

Playful Bubble Wheelspin
Our Moonwalker is a flat, spinning disc which is fantastic fun when used seated, standing or lying down, with each position challenging both balance and coordination for all children.

Having these three distinct play functions creates challenge for children who need it while also providing a great dynamic experience for those who may feel less confident or have less physical mobility.

The Revolve provides sensations children can’t simulate easily in every day life by combining both a spinning and rocking movement which can be used for gentle spinning or fast, dynamic play. The large bowl provides postural support and the opportunity to play with a parent or friends. The outer ledge, coupled with the seating position created by the deep bowl makes the Revolve very accessible to children of all abilities. The wide rim, not only allows for ease of transfer but also increases play value as children can sit comfortably to propel themselves around independently.
The Fusion is a fun multi-user spinning play activity for children of all abilities. It provides a spinning motion for vestibular stimulation which aids the development of balance and coordination as well as promoting confidence and trust of movement. The wide outer rim designed at wheelchair transfer height for ease of use can be used as seating space. The deep bowl offers a degree of comfort and can fit up to 3 children. It also offers postural support for those who may require it. Available in three colour options to enhance any play space.
Our Infinity Bowl with its unique dipped edge design has been thoughtfully developed to increase inclusivity allowing far easier access into and out of the bowl.

The bowl is designed to sit at an angle which further increases ease of access and provides a comfortable seated position while also enabling the bowl to self-propel; a child need only tilt their body slightly to get the bowl moving. This not only encourages independence but also allows children to play on their own with minimal physical exertion.

The more inclusive, accessible version of the traditional seesaw can be used in a variety of ways, allowing the user to define their own play experience. Designed at wheelchair transfer height, a child can easily move onto the unit. The upturned arms allow the user to sit or lie supported on the surface which is beneficial for those who require some extra postural support. The wide surface is covered in porous rubber ensuring users feel safe and secure while standing.

The surfboard is spacious enough for several children to sit or stand together.
Our four-way Orb Rocker allows friends to play together, combining the sensory elements of sound and colour contrast with the physical stimulation of dynamic, rocking motion which is essential to develop a child’s balance, posture and head control.

The Orb Rocker has been designed so that children can achieve good sitting balance assisted by the hand grips.

The Butterfly rocker is a 4-way seesaw that has space for two children in a lying position as well as two children seated. The children meet in the middle where they can play together and rock the butterfly, making it a highly inclusive product.

The unique belly seat creates a new experience for children who previously may have been excluded from playing. The rocker provides support and the supporting beam prevents children from falling off.
The multi user rocker is designed to allow up to 6 children to play together at one time. There are 4 seats with back supports and foot rests to play in a rocking motion. The middle section designed at wheelchair height, enables children to either sit or lie in the middle and experience the rocking motion. There are a range of handles to hold on to for those children lacking in confidence. The soft rocking system is designed not to hit the ground and maintain a soft motion.

The larger of our trampolines provides ample space for a wheelchair user and a parent or carer to enjoy. Perfect for free play as well as organised games, our trampolines are suitable for installation in both supervised and unsupervised play spaces.

Trampolines are one of the most inclusive items as they are inter-generational and allow children of all abilities to play. They engage both the vestibular and proprioceptive senses, both of which are important for cognitive development and understanding the body’s position in space.

Inclusive Play®
Sensory & Play Panels

Sensory play equipment and play environments are crucial to all children’s development. Tactile experiences provided within a play space help to develop and exercise the user’s sense of touch, vision and sound. These sensory experiences provide an opportunity for a child to have their whole body involved in play.

This can come from products such as our sensory and play panels, natural elements like boulders, landscaping features such as mounding and planting or tactile play using sand and water. All of these can elevate a child’s experience within a space, providing them with the opportunity to engage all of their senses in play.

By incorporating sensory and play panels within a new or existing space you’re providing play opportunities and stimulation for all children to enjoy together. Play panels help develop logical understanding, decision making skills and strategical thinking in a fun environment that they can enjoy with their friends, family and carers. Our sensory panels can also be used to create a quieter space, away from the main action, to allow children to spend time away from a noisy, busy space which can be intimidating and overwhelming.
The Dune Sandpit is our second product to utilise the unique belly Seat. The elevated Inclusive sandpit is the first of its kind. There are a number of access points to allow children with varying abilities to play together. There is the belly seat, a platform to stand or kneel on, and access for wheelchair users. There is also a space in the middle for a child to stand in and play. This is a family friendly sandpit where everyone can play together.

Our new Talk Station talking posts are a great addition to our product range. Rotate the inclusive smily face, watch the power meter build up with the LED display as you generate power. Designed to be operated at wheelchair height the whole family can interact together. The posts can be positioned up to XX meters apart. This is a fun addition to the inclusive family.
The Orb, which is available in a choice of bright colours, is one of Inclusive Play's most popular products. It is highly sensory, fun, friendly and accessible to every single child. It rocks, makes a sound and the textured surface with ridged edges makes it a highly tactile unit. There are 4 options available:
Dark Green/Beige with the sound windchimes
Light Blue/White with the sound of ball bearings
Light Green/Yellow with the sound windchimes
Blue/Yellow with the sound of cat bells

Our Mezzo offers visual stimulation and engagement with the clear panel at the top allowing children to look inside and watch the balls move around. The textured surface with ridged edges and contrasting colours makes this a highly tactile unit too.
Simple, yet engaging, our Mezzo offers children of all abilities a chance to interact with movement which they can control; a great way to encourage gross motor skills and establish the idea of cause and effect.
Our Timber Orb is also available in beautifully hand-crafted timber which works perfectly in natural, landscaped play spaces, with the timber providing an alternative tactile experience. We believe including natural materials throughout a space can offer a valuable sensory experience.

The Rainmaker’s smiling face is a welcome addition to any playground and becomes even more appealing once a child starts to move it. Creating a calming sound of rain, it is a fantastic tool for encouraging physical movement as well as helping to develop a child’s concentration and coordination skills. When situated in a quieter space the Rainmaker can placate stressed and upset children with its calming sound and repetitive movement.
Minisphere

Our Minisphere is a two-sided play panel designed to be installed at a low height to allow access for young children and wheelchair users. Each game is different, one with a high visual appeal which is great for children with limited mobility and coordination, whereas the other increases children’s awareness of function and movement whilst challenging their fine motor skills.

Microsphere

Our Microspheres have been designed for installation on walls, fences and play units for sites which may be short on space but still want to increase the sensory play experience. The Ball Maze focuses the mind and allows children to explore problem solving, coordination and team work. The Rain Wheel is visually and aurally stimulating encouraging fine motor skills and coordination. The Microspheres have been designed with larger handles to make it as easy as possible for everyone to use.

Drawing has always been a fun and enjoyable way of expressing oneself while improving fine motor skills and helps to illustrate ideas which children may struggle to articulate in other ways. Our Scribbler chalkboard is a fantastic way to bring this fun activity to outdoor play spaces. A chalkboard can not only provide a space where children can draw for fun but can also encourage children’s communication skills and encourage quieter, calm play for those who need some time away from the main action.

Our Tactile Topiary play panel has been designed to create a sensory feature with a variety of different tactile experiences. The spinning and moving counters are great for developing coordination and fine motor skills which many children who undertake play therapies often practice.

Our Tic-Tac-Toe play panel has been designed at accessible height with contrasting colours and braille to help everyone enjoy this well-known game. These simple, easy to understand games help children develop their fine motor skills, logical understanding and strategy in a fun environment which can be enjoyed with both peers and family.

Our 3-To-Connect has been designed specifically for outdoor use, removing any small, loose pieces. It is a fun game that helps children understand the decision making process and develop logic. A great game for the whole family.
The Collider

Our Colourfly provides fantastic visual stimulation allowing children to look through the coloured wings to see their environment a little differently. Users can control how they change their view and interact with their surroundings. This play panel is perfectly suited for all play spaces but is great for creating quiet zones within a space to allow children a little time out, away from a noisy, busy play space which some children can find overwhelming and intimidating.

When a child doesn’t have the ability for physical movement, watching other things move can be engaging and therapeutic. We have incorporated sensory play into our Collider, with the sound of bearings colliding and the see through panel. Even though the play is less hectic, it remains valuable.
Fun Reflections

The Daisy Doodle chalkboard has been designed to inspire creativity in any play environment and can be fitted onto walls or freestanding with posts. Encouraging children to draw is a great way to inspire creativity and communication, engaging them with their environment and observing what is around them.

Our Fun Reflection wobbly mirrors add a fun, visual element into any play space. Fun Reflections distorts the world around, which helps to challenge perceptions. Mirrors are a fantastic way for children to watch movement and become more aware of themselves and the people around them. The Fun Reflections is available in 3 versions, either Standard, Concave or Convex.

Swings are playground favourites and an essential part of our range because every child has the right to enjoy the wonderful, freeing sensation that the movement of swinging brings.

Our range of swings provides a solution for all needs and spaces; from our iSwing which allows full wheelchair access, to our Combination Swings which combine all the favorite options.

Our new Buddy Swing is a unique addition to the range designed to promote intergenerational play in which a parent and child can play face to face.

All our Flat and Cradle Seats come with anti-wrap bearings as standard which prevent the chains from becoming wrapped around the crossbar, limiting the impact and possibility for anti-social behaviour.

The movement of swinging has benefits for all children; being soothed and comforted by the rhythmic swaying can be great for children who may be overwhelmed by the action around them.
**Sit Up Swing**

Our Wave Swing is one of the most multi-functional swings available. It can provide a social hub where children can play in groups but also allows a child to sit or lie with support from a family member or carer.

The benefits of our nest seat are that it has been designed to be shallower than the traditional nest allowing users to move in and out more easily. The swing has also been created with children, teens and adults in mind providing a piece that can be enjoyed by the whole family.

---

**iSwing**

This unit has been designed for those who cannot easily move out of their wheelchair. It is an essential part of our range as everyone has the right to enjoy the freeing sensation that swinging brings.

The rope pull included within the design allows those with upper body mobility to be able to swing themselves independently.

Wave Swing

Our Wave Swing is one of the most multi-functional swings available. It can provide a social hub where children can play in groups but also allows a child to sit or lie with support from a family member or carer. The benefits of our nest seat are that it has been designed to be shallower than the traditional nest allowing users to move in and out more easily. The swing has also been created with children, teens and adults in mind providing a piece that can be enjoyed by the whole family.

Mini Wave Swing

The Mini Wave Swing is the smaller version of the popular Wave Swing. With a smaller basket seat this swing can provide and inclusive experience in a more compact design. With the ability for children to play on their own or with others this the Mini Wave Swing is fun for all.
Buddy Swing

Our Buddy Swing is a unique addition to any play space, designed to promote inter-generational play in which a parent or carer can get fully involved. Sitting face to face allows the opportunity for interaction and communication between both users in a fun and playful setting. This close contact with a parent or carer can be vital for some children who need more emotional support within a busy play setting. The face to face seating creates a safe and comfortable environment to be enjoyed in times of stress or upset.

New Product

Swing Easy Hammock

The Swing Easy Hammock is the most relaxing of product. However, it can also be very dynamic. Take time out to rest and recharge alone or with a friend or carer. Use the relaxing and comforting elements of the hammock as you unwind. When you are ready let it swing away and have more dynamic fun.

New Product
Our Triple Bay Combination Swing provides a social space for children of all abilities to interact and play together.

With options that provide extra support coupled with traditional seats this is a fantastic piece to create a social space within your inclusive play area. The configuration of the two seats can be altered to your needs, having either two flat or cradle seats or one of each.

This swing is a great way to offer a real social setting for children of all abilities to play together. The Sit Up seat provides a space with extra back support for those who need it whilst our popular Wave seat allows the space for all children to play in a group. Both seats are situated at wheelchair transfer height to allow children to move in and out more easily.
Our swing range is totally flexible giving you many different seating options. With options that provide extra support coupled with traditional seats our swings create a social space within your inclusive play area. The configuration of the two seats can be altered to your needs, having either two flat or cradle seats or one of each. Flat and cradle seats always come with antiwrap bearings making sure they are always available to use.
Creating music is one of the most powerful forms of development; it helps encourage language and problem-solving skills and promotes spatial awareness whilst also being a hugely enjoyable, social experience.

Our tuned instruments allow you to bring music into your play area; transforming your play space into a multisensory experience for all users, but particularly for children who may struggle to enjoy this experience using more traditional playground equipment.

Music allows all children to interact together in a relaxed environment where there is no fear of making a mistake; children can express themselves whilst developing a sense of rhythm, communication skills and their ability to work as part of a team.

Alternatively, musical items can also be used to relax stressed, overwhelmed children by providing them with a space where they can take time away from the main play space and enjoy some one on one or alone time while still enjoying play.
Creating music is one of the most powerful forms of development for all children; helping language, problem solving and spatial awareness as well as team work. Our Music Box range has been designed to give children free access to creating music and can be bought as a set or as a one-off product, bringing the fun of music to both indoor and outdoor spaces. Can be used standing up or accessed with at wheelchair height. You can create your own fun with the Bongos, Xylophone, Glockenspiel or the Tongue Drum.

Our Rainbow Chimes are a visually striking way to bring music into your play space. Designed to be installed on posts or on a wall or fence the visually striking colours offer contrast and help the unit stand out. Music is a great way to bring people together and these chimes can be enjoyed as a group or in solitary play. Many children, regardless of their needs or abilities, find music incredibly relaxing and can be soothed by the repetitive nature of hitting a note and immediately hearing the sound.
The rainbow chimes range includes; the Solo a small compact design, the Quartet which encourages children to work in a team, or the Cascade which creates a giant social musical area. Children can create their own musical games running round the posts which is a fantastic way to bring movement and sound together helping to develop coordination and focus. It’s also a great way to encourage physical fitness. However, children use the chimes there are opportunities for every child to be involved regardless of ability.
