

Motion

Our Revolve provides sensations children can't simulate easily in every day life with a spinning movement which can be used for gentle spinning and fast, dynamic play.

The main bowl is set on a 5 degree tilt to help with self propulsion. The outer ledge, coupled with the seating position created by the deep bowl makes the Revolve very accessible to children of all abilities. The wide transfer not only allows for ease of transfer but also increases play value as children can sit comfortably to propel themselves around independently.

Scale: 1:50

A4

Activities	.. Rocking, rotating, social, supportive movement
Features	.. Multi-directional rotation, tactile surface
Age Range	.. 4+ years
