

Motion

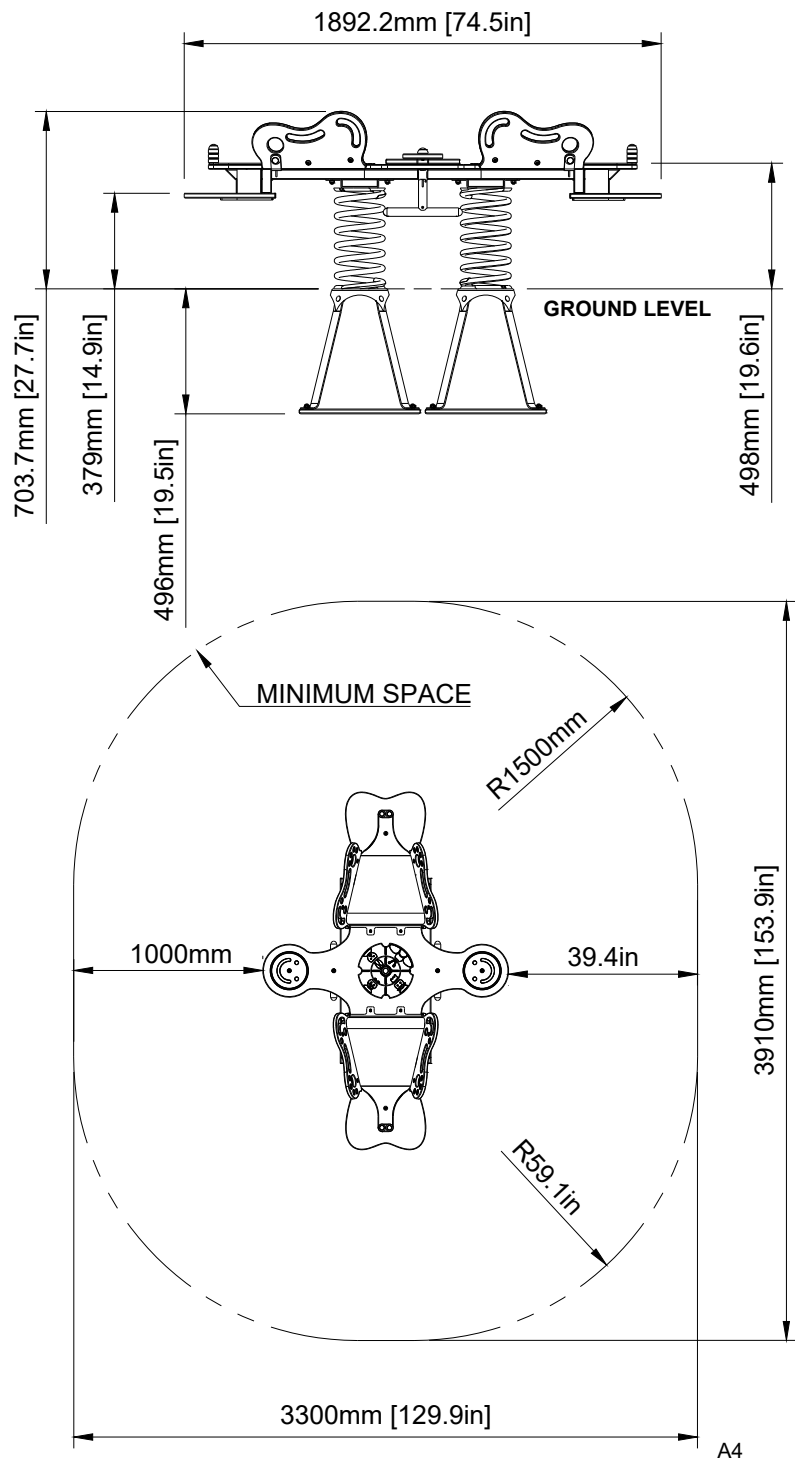

The Butterfly Rocker is a 4-way seesaw that has space for two children with physical impairments in a lying position, as well as two additional children in a sitting position.

Users meet facing in the middle where they can play together on the centre tactile game and rock the butterfly, making it a highly inclusive product.

The Rocker provides support on the sides for those who are lying down, and a supporting beam at the back which supports the child's knees and prevents them from falling off. There are a range of handles and gripping areas for children to use based on their confidence.

Scale: 1:50
