

Oak provides an alternative tactile experience. Including natural materials contributes to sensory exploration.

Tactile Orbs offer an accessible sensory experience for all ages and abilities. Children who use wheelchairs can access the large surface area from all sides, making it easier to rock. Movement and the smooth oak surface with stepped edges create intrigue for hard of hearing or deaf children. Perfectly suited to natural, landscaped play spaces.

Scale: 1:30

Activities	: Sound, movement, tactile, sensory, supportive movement
Features	: Natural textured surface and ridged edges
Age Range	: All ages
No. of Users	: 1
