

Our Rainmaker's smiling face is a welcome addition to any playground and becomes even more appealing once a child starts to move it. Creating a calming sound of rain, it is a fantastic tool for encouraging physical movement as well as helping to develop a child's concentration and coordination skills.

When situated in a quieter space the Rainmaker can be a great piece of kit to placate stressed and upset children with its calming sound and repetitive movement.

Scale: 1:40

A4
