

Sensory and Play Panels

Our Colourfly provides fantastic visual stimulation allowing children to look through the coloured wings to see their environment a little differently.

Users can control how they change their view and interact with their surroundings.

This play panel is perfectly suited for all play spaces but is great for creating quiet zones within a space to allow children a little time out, away from a noisy, busy play space which some children can find overwhelming and intimidating.

Scale: 1:30

A4
