

Motion

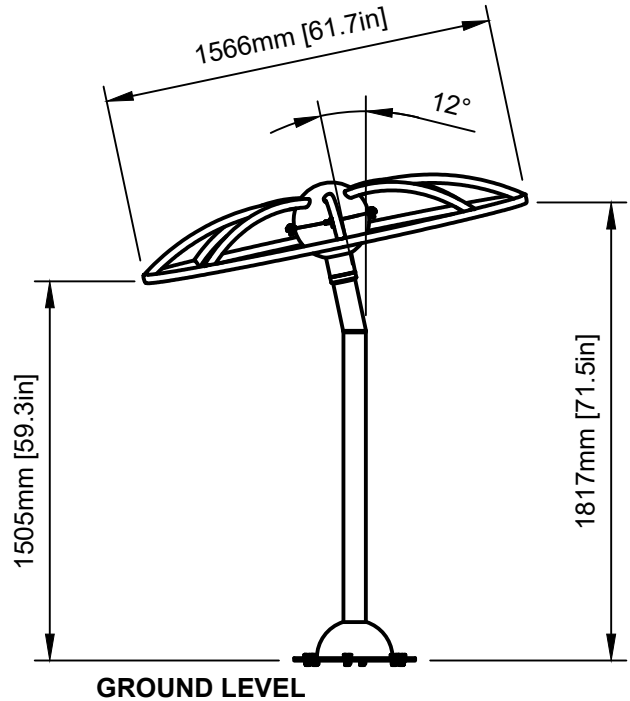

The Crazy 8 is designed to encourage physical, cognitive and social development through active play.

Its eight-legged design provides multiple grip points and ways to interact with the equipment, allowing children to explore movement at their own pace. The 12° inclination encourages children to shift their body weight to create movement, helping develop coordination, balance, body awareness and motor planning.

The Crazy 8 provides opportunities to explore cause and effect, build confidence and develop an understanding of movement and spatial awareness through hands-on play. The repetitive, self-directed motion can also provide an engaging sensory experience, allowing children to explore movement, rhythm and balance in a way that suits their individual needs.

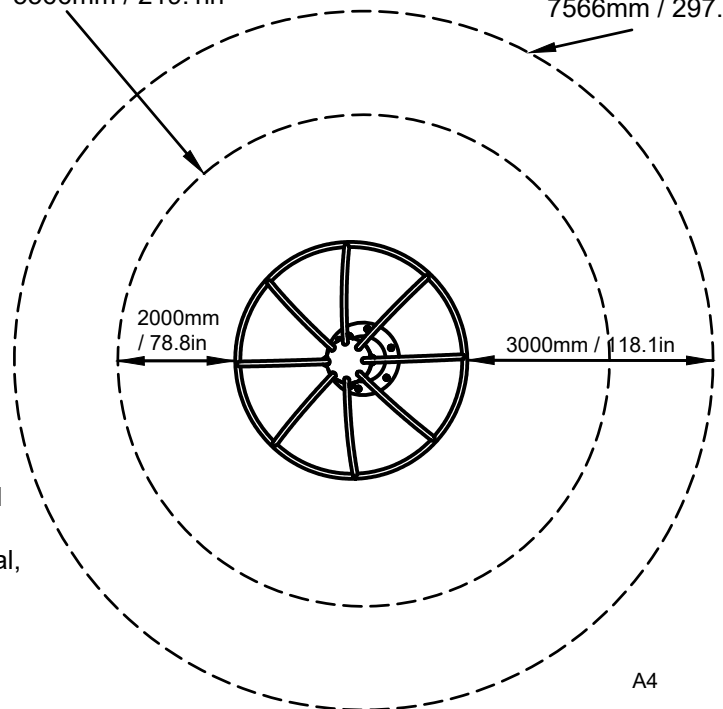

The Crazy 8 can be enjoyed independently or with others, encouraging communication, turn-taking and shared play.

With its combination of movement, sensory exploration and social interaction, the Crazy 8 offers an adaptable play experience that supports children across a range of physical, cognitive and developmental abilities, while keeping the focus firmly on fun.

Minimum Space
5566mm / 219.1in

No-Overlapping
Zone
7566mm / 297.9in

Scale: 1:30

Activities	.. Spinning, hanging, social
Features	.. 12° inclination promotes self-propelled motion
Age Range	.. 5+ years
No. of Users	.. 4
Falling Space	.. 24.3m ² / 261.9ft ²
FFH	.. 1.8m / 6ft
Materials	.. Galvanised & powder-coated steel frame
Approx. Weight	.. 81kg / 178.5lbs
Concrete Volume	.. 0.3m ³ / 11ft ³
