

3 Colour Options

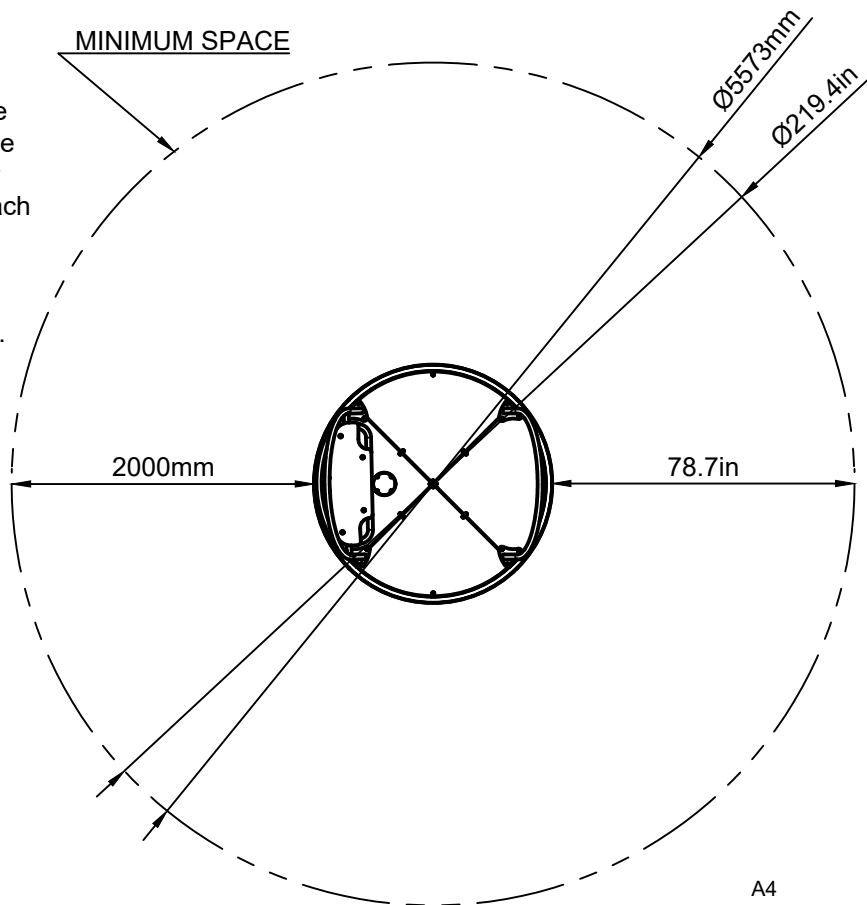

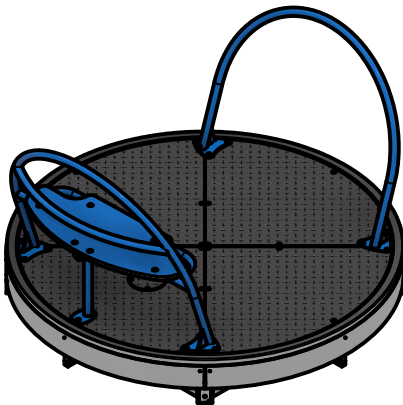

Motion

The unit can be used in a standing or seated position due to the inclusion of a seat and can be accessed by all users as it is level with the surrounding groundwork; making it a roll-on product.

The vacant space between the two rails has been left deliberately to allow a wheelchair to access the unit by rolling on - once on they can rotate and take hold of the arched rail for support during motion or utilise one or both of the hand-holds present on each seat.

The unit is relatively small in comparison to its counterpart, having a diameter of 1573mm (61.9"). Thus allowing this unit the possibility of being installed into a wider range of play spaces.

Scale: 1:25

A4

Activities	.. Spinning, social, standing, seating
Features	.. Wheelchair accessible, roll-on access height, compact unit, 1573mm Diameter.
Age Range	.. 3+ years
No. of Users	.. 3+
