Data Sheet for IP8057 - Velocity

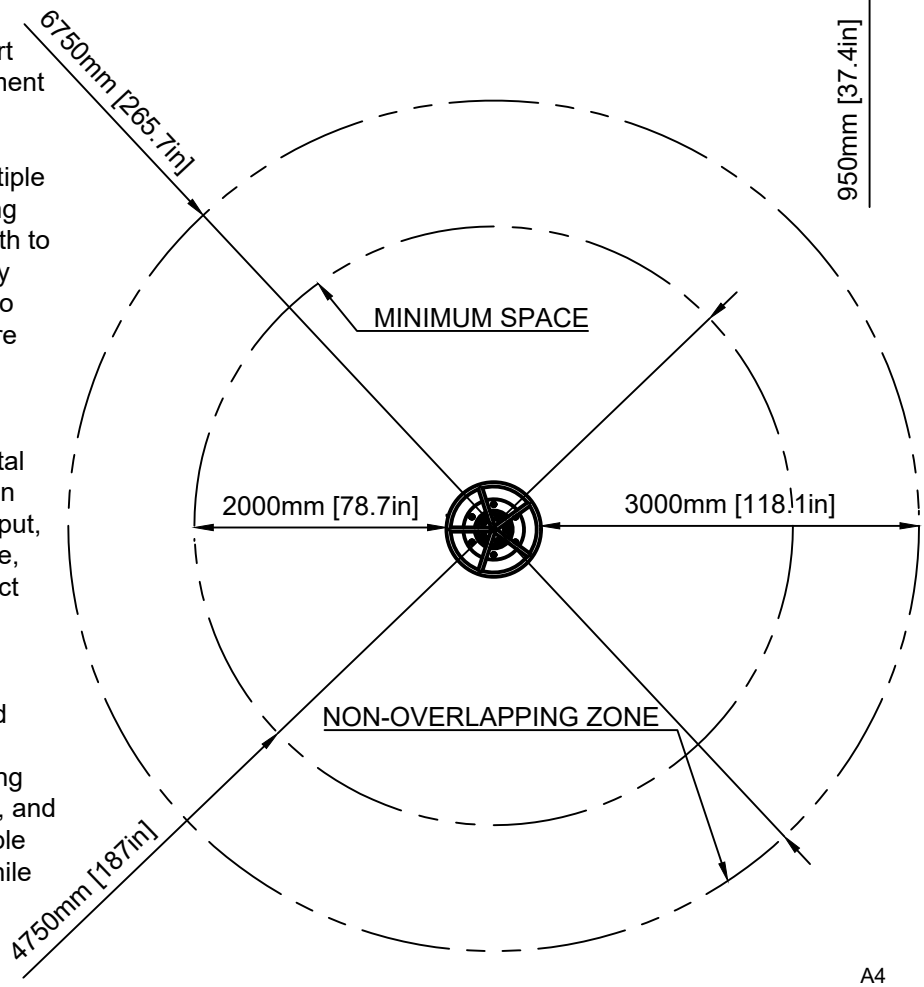

The Velocity is an exciting, inclusive spinning experience designed to support physical, cognitive, and social development through active play.

Its overhead wheel design features multiple grip points, allowing children with varying reach, dexterity, and upper-body strength to explore movement at their own pace. By hanging and running along the ground to create momentum, children develop core strength, motor planning, and body awareness.

For those with cognitive or developmental needs, the self-directed rotational motion provides essential vestibular sensory input, helping build spatial awareness, balance, and confidence through cause-and-effect play.

Accommodating up to three children at once, the Velocity fosters teamwork and non-verbal communication as peers collaborate to power the unit. By blending physical challenge, sensory exploration, and cooperative play, it provides an adaptable experience for children of all abilities while keeping the focus firmly on fun.

Scale: 1:60

A4

Activities	.. Spinning, hanging, social
Features	.. Compact size promotes fast movement
Age Range	.. 5+ years
No. of Users	.. 3
Falling Space	.. 35.8m² / 385.3ft²
FFH	.. 1.75m / 5.7ft
Materials	.. Galvanised & powder-coated steel frame
Approx. Weight	.. 83kg / 183lbs
Concrete Volume	.. 0.3m³ / 11ft³
